

I am a trucker who uses the XM Traffic channels to safely maneuver around the logjammed traffic situations found in all the cities served by XM. My use of this service would not be served by the "chatterbox" pop stations I would be left to scan if the XM service is interrupted. More importantly, safety becomes an issue when I have to be distracted from the road while I search. Local radio stations earn revenue by selling airtime to commercial establishments...XM earns revenue by my monthly subscription, it would be a disservice to the public to not allow XM to provide this SAFETY SERVICE to the community!

Thank you,

Robert Hammack
